## Rugby Community Hall Opens August 12th.

An auspicious day for the west-of-town districts and no less for the town itself, will be Friday, August 12th—opening date of the Rugby Community Hall. The new hall is located 12 miles west and 1 south of Didsbury.

A complete sports program, including baseball, softball and other games and races, has been arranged for the afternoon, commencing at 2:30.

A big chicken supper provided by the ladies of Rugby and district is billed as from 6 to 8 p.m., followed by the opening address and short program at 8:30, with Archie Boyce as speaker.

To wind up this notable occasion in Rugby history, the Calgary Hill billies have been engaged to play for the grand dance which will occupy the balance of the evening.

Visitors may obtain ice-cold refreshments throughout the day and evening from the large booth which will be in evidence.

The people of Rugby issue a most cordial invitation to one and all to go out and enjoy a grand and glorious day with them on the 12th.

and other requirements such as Zerk Fittings, Canvas Webbing, Rivets, Slat, Oilers, Grease and Oil.

## Didsbury Wins 7-6 In Softball Playdown

Overcoming a two-run deficit with a 8 run rally in the ninth, Didsbury defeated the Calgary Hill Billies 7-6 in the first game of the intermediate softball playdowns on the town diamond Thursday night last.

At the end of the 1st inning Didsbury were one up on a run scored by Roman Holub, the score reading in the locals' favour, 1-0.

In the 2nd Calgary came back to take the lead at 2-1 on runs by Hansen and McDougal. The 3rd was blank, as both sides were retired hitless.

Calgary were again retired in the 4th, while Didsbury secured 2 runs through Holub and Haldane.

Smart fielding and pitching by both teams again produced blanks in the 5th and 6th. Brightman scored for the locals in the 7th to make it 4-2.

The 8th inning saw a rally by the Hill Billies, three runs coming from Kipling, Brabant and Kaye to give them the lead one ahead of Didsbury.

The spectators were tense with excitement in the 9th and last inning as Allan Krebs reached first on a double by Hank Morasch, who crossed the plate with the winning counter on a single by Berscht, to make it Didsbury's game by 7-6.

Score by innings:  
Calgary 020 000 031—6 10 2  
Didsbury 100 200 103—7 11 2  
Calgary: Hockley, p; Brabant, c; Kaye, cf; McDougal, 1b; Leew, 2b; Walters, 3b; Hansen, rf; Kipling, lf; Baker, ss.

Didsbury: Holub, p; Tuggle, c; Berscht, cf; Morasch, 1b; Haldane, 2b; A. Krebs, 3b; Brightman, rf; E. Morrison, lf; V. Morrison, ss.

Umpires: Ward Wyman, Didsbury and L. Lane, Calgary.

## Catches Banana Spider

Charlie Geiger caught a live banana spider in a bunch of bananas this week and Bill Ranton was displaying the specimen in a glass sealer Tuesday.

This species of spider makes its nest amongst banana bunches and is known to be poisonous owing to a dove-colored sac or egg which is attached to its under carriage by a slight thread. The egg on this specimen would be about the size of a small thimble. The spider's eight legs had about a three-inch spread and its antenna was of a minute size in comparison. Its undercarriage is of an orange-red color and its upper body of striped mouse and brown color.

Banana spiders should be handled cautiously and immediately destroyed. This is the second banana spider to appear in Didsbury, the first being caught by Al Thomas last week.

## Lands Unusual Fish.

Mr and Mrs. Wm. Smith were out at the Little Red on Sunday, where Bill managed to land an unnamed fish with a pike's head and trout's body. It measured 32½ inches long and weighed about 12 pounds.

Mrs. Bert Fisher said the portion they received made excellent eating, and Bill said it was the biggest fish he had ever caught as yet.

## Obituary.

SUSANNAH ZELLER CLEMENS

Succumbing from a stroke, Mrs. Susannah Zeller Clemens, 77, died at her home early Tuesday morning to add to the heavy toll of Didsbury-Carstairs oldtimers in recent months.

Born November 14, 1861 at Breslau, Ontario, Susannah Zeller married Milo B. Clemens there, September 21, 1883. The couple came west in 1901, settling at Carstairs and in 1907 moved to Didsbury. From 1910 to 1918 the family lived at Cereal, then returned to Didsbury where they have resided since.

As a member of Zion Evangelical Church, Mrs. Clemens was an active worker in all church organizations.

Left to mourn her loss are: her husband; two sons, Edgar of Calgary and Harold of Edmonton; three daughters, Mrs. M. M. Utterback, Chelan, Wash.; Mrs. C. E. Ratcliff, Kimberley, B.C. and Mrs. J. W. Halton, Didsbury; also seventeen grandchildren and three great-grandchildren. Mrs. Clemens is predeceased by two sons, Roy in 1937, and Claire in infancy.

Funeral services will be held from Zion Evangelical Church at 2:30 p.m. today (Thursday), with Rev. A. S. Caughell in charge. Interment will take place in the Didsbury Cemetery. Funeral arrangements were conducted by the W. S. Durrer Funeral Home.

## Discover Body After Kidnapping

While Mr. and Mrs. Scheidt were listening to the Texaco news Thursday evening, word came over the air that Betty Schnaidt, 17-year old niece of Mrs. Scheidt of Sioux Falls, South Dakota, had been kidnapped, and that local police and 100 national guardsmen were searching for her.

On Tuesday, August 2nd, Mr. and Mrs. Scheidt received a telegram notifying them of the discovery of the body on Monday evening of this week. The funeral was held at Sioux Falls today (Thursday).

An arrest has been made upon circumstantial evidence. Also a nationwide search for an ex-convict is under way.

The sympathy of the whole community is extended Mr. and Mrs. Scheidt in this unfortunate occurrence.

## Petition Government For Cheese Factory

Some 90 farmers in the country east of town, owners of a little better than 800 cows, decided at a recent meeting to go ahead with plans to erect a cheese factory.

Petitions have been forwarded to the provincial government and a favourable reply is eagerly awaited. A suitable site will be chosen as soon as official sanction is received, and a full slate of officers will be elected to carry on the work.

Ed Liesemer acted as chairman of the meeting and W. M. Smith as secretary. The committee in charge of investigations comprises J. C. Wiebe, Ed. Liesemer and Dave Peters.

## Olds Area Again Hailed

A thirty-minute hailstorm struck the country lying west of Olds on Saturday evening for the fourth time in a couple of weeks, causing extreme damage which conservative estimates place at around 50 per cent.

Barley crop losses were particularly heavy as the grain was well advanced and would have been ready for cutting in the next four or five days.

Intermittent hail fell in a 40 mile stretch extending from 9 to 16 miles west of Olds to Cremona and north to Sundre, ruining many fields which escaped the earlier storms of mid-July.

Eagle Hill reported heaviest losses at from five to one hundred per cent. A veteran grocer in that district said total loss for the district in the four storms was in excess of sixty per cent.

The storm moved southeast with only light rains to mark its path before it struck again east of the C.P.R. line through Didsbury, Olds, and Bowden. The Trochu district felt its blast at 7:15 p.m. Saturday when crops at Equity and south to Three Hills were almost completely wiped out.

## THANKS.

The Didsbury Racehorse Association takes this opportunity of thanking all those who made possible the successful sports program on Fair Day.

Russell Carleton was a Sylvan Lake visitor on Sunday.

## Scout and Cub Corner.

Scouts will muster 7.30 p.m. at depot platform tonight.

Scoutmaster Al Thomas is attending the Gilwell Leaders Camp at Waterton this week.

Scouts Don Mortimer, Bill Newton, Eldon Foote, Ralph Edwards, Lloyd Erb, Earl Erb, Frank Goosen and Gerhardt Bogner returned from Camp Woods at Sylvan Lake on Sunday. They reported a most instructive and enjoyable holiday.

Scouts Sam Boorman and Don Dunlop are taking in Camp woods this week.

Try a pair of men's Ranch Rider pants. They fit and give good wear. Price \$1.75. Get them at Berscht's.

## PLYMOUTH TWINE.

Buy CANADIAN  
BINDER TWINE

- \* Plymouth Twine is made in Canada by Canadian workmen in our mammoth factory at Welland, Ontario.
- \* It is skillfully spun from clean, strong fiber and has uniform length, strength and evenness.
- \* Constant testing insures evenness of spinning. This means freedom from breaks and delays during harvest.
- \* Special winding prevents tangling and insures free running twine. Scientifically treated against insect damage.
- \* Plymouth Twine is wrapped in a moisture-proof liner and then packed in clean, new burlap sacks. The finished bale of twine weighs 50-lbs. gross and is branded "Made in Canada."
- \* The bag may be used as a grain sack, and the new rope lashing makes a most serviceable halter.
- \* Plymouth Red Top is spun 600 feet to the pound. Each grade of Plymouth Binder Twine is guaranteed to average full length and strength and to possess the same Six-Points of Plymouth Superiority.

## A Definite Program Needed

With the return to more nearly normal climatic conditions resulting, in Western Canada at least, in larger returns from agricultural operations the time seems to have arrived when greater consideration will have to be given to a national policy which will ensure a better balance in the future between the industrial and agricultural life of the country, than has hitherto existed.

It can be admitted forthwith that there is nothing new in the doctrine of a better balanced economic structure. The need has been recognized and voiced on previous occasions by statesmen, economists and politicians, not only in the recent depression days, but similar statements were made as far back as ten, fifteen and twenty years.

In the past, however, such injunctions have usually been regarded more or less in the nature of an academic or textbook theory, as an ideal perhaps to be kept in mind, but without any particular pressure being brought to bear as to the necessity for shaping all governmental, private and corporate activities towards this specific end.

### Towards An Objective

Now, however, that the country is presumably on the threshold of an era of rehabilitation and recovery, it would appear highly desirable that the main objective for the future development of the country and, ergo, the prosperity and happiness of her people be not lost sight of; that whatever policies are devised to assist the people and the industries of the country to re-establish themselves on a self-dependent basis, they should all lead in the one direction—a more nearly balanced economic life.

Until this is done there can be, not only no guarantee, but not even a prospect, that there will be no return of similar conditions to those from which the Dominion is now apparently emerging, at some time in the future, possibly not far distant, perhaps more remote.

In comparison with other industries it must be borne in mind that agriculture affords comparatively little employment and while the farmer is producing, under normal conditions, huge quantities of foodstuffs, the industry itself makes almost no provision for workers to consume its products.

It is therefore essential that other industries giving employment to a relatively large number of workers exist side by side with agriculture in order to ensure consumption locally of a larger percentage of the commodities produced by agriculture, if the latter industry is to prosper. The only alternative for an industry dependent upon remote markets of world-competitive character for the sale of the bulk of its products is to curtail production.

Now, while curtailment of production may, to some, appear expedient, it is a wasteful policy, difficult of attainment where output is largely dependent upon the vagaries of seasonal climatic conditions and above all, history has yet to record success in this field of experimentation. In other words, it is not the road to prosperity.

This being the case, the objective of those who have the welfare of the country at heart should be measures which will ensure greater consumption of the output of agriculture as close as possible to the site of production.

### A Combined Aid

So far as Western Canada is concerned there are many ways in which this may be achieved, no one of them in itself a complete solution of the problem, but a combination of them, with each pressed to its ultimate possibility, should go far towards placing agriculture on a more permanent and prosperous basis.

The solution of the problem for western agriculture appears to lie in the direction of greater consumption at home of the products of the field and the farm. It predicates among other things greater diversification of agriculture to ensure local markets for a greater percentage of the products of the farm. It suggests local processing of more of the products of the field, thus providing for the establishment of more industries affording employment for more consumers and ensuring their ability to purchase these commodities—a natural concomitant of greater diversification.

It also indicates the necessity of more vigorous prosecution in the search for and development of the natural resources with which the west is richly endowed, again providing more sources of employment and hence of greater consumptive ability.

As a further means to this end there is ample scope for research work into the possibilities of making greater use of agricultural products as raw materials in manufacturing processes, which in turn would open wider opportunities for diversification in agriculture and create more industries, hence, increase consumptive demands.

There are also possibilities in the further development of by-products from grains and other agricultural commodities now grown more or less extensively on Western Canadian farms, and with further research and experimentation some of these by-products could be made a commercial feasibility. There are in the western cities chemical and laboratory experts who have done some work along these lines who are in entire accord with this statement.

### A More Enduring Basis

These are only some of the possibilities which, if they were co-ordinated under some general national program, would go far towards re-establishment of the agricultural industry on a more certain basis than it has been in the past and which would go a long way towards softening the blow of future depressed conditions.

Such policies pressed to an ultimate and logical conclusion with whole-hearted co-operation between all who are concerned with the future of the country would do much to promote prosperity and contentment and many of the "isms" with which the people have recently been afflicted would vanish into thin air.

A "glass train" exhibited in London has two passenger coaches with walls, ceilings, floors, and fittings made of glass, and 100,000 tiny mirrors covering the exterior.

Weighing 42 pounds, the world's largest sapphire is valued at \$20,000. It is a white sapphire; had it been blue, its value would have been incalculable.

## Test Smoke Screens

### Defence System For London To Guard Against Air Attacks

When and if bombs start dropping in the next war, London will face a tougher problem than when the Germans peppered the city from Zeppelins 20 years ago.

Officials say the defence system will have to strike a knock-out blow in the first week of war to show enemy bombers lightning attacks are too costly.

Attacking planes probably will roar only 200 feet above rooftops—safely beneath the curtain of fire of anti-aircraft artillery.

To counteract high attack and make low attack difficult the government is testing smoke screens to strengthen the balloon barrage it plans to throw around the city.

The screens would be flung up from generators placed at close intervals.

A new camouflage department of the air raid precautions administration also is co-operating with the Royal Air Force in camouflage tests on larger buildings.

In "A.R.P." the government has a countrywide scheme to protect civilians in bombing raids, aid injured, fight gas attacks, and move non-essential members of the population to safety areas.

But wide publicity hasn't popularized "A.R.P." the way the government intended. Lack of co-ordination has been blamed mainly for failure to get recruits for anti-gas and first aid units.

Home office drafted a broad program and left municipal authorities to work out details. Many volunteers had to wait weeks to begin training due to shortage of skilled instructors. The government now is trying to whip up fresh enthusiasm for its big defence scheme.

## SELECTED RECIPES

### RASPBERRY SHORTCAKE

3 cups sifted Swans Down Cake Flour  
3 teaspoons Calumet Baking Powder  
1 teaspoon salt  
1 cup butter or other shortening.  
3/4 cup milk  
1 1/2 quarts crushed, sweetened raspberries

Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk all at once and stir carefully until all flour is dampened. Then stir vigorously until mixture forms a soft dough and follows spoon around bowl. Turn out immediately on slightly floured board and knead 30 seconds. Roll 1/4 inch thick into sheet, 16 x 8 inches. Cut in half. Fit one half into well-greased 8 x 8 x 2-inch pan. Brush with melted butter. Fit second layer of dough into pan. Brush with melted butter. Bake in hot oven (450 degrees F.) 15 to 20 minutes, or until done.

To serve, separate halves, spread bottom half with soft butter and part of raspberries. Adjust top and spread with butter and remaining raspberries. Garnish with whipped cream and whole berries. Serves 8 to 10. Strawberries may also be used.

### TEA MUFFINS

1 1/2 cups sifted Swans Down Cake Flour  
1 1/2 teaspoons Calumet Baking Powder  
1/2 teaspoon salt  
4 tablespoons butter or other shortening  
4 tablespoons sugar  
1 egg, well beaten  
1/2 cup milk

Sift flour once, measure, add baking powder and salt, and sift again. Cream butter, add sugar, and cream thoroughly; then add egg and beat well. Add flour, alternately with milk, a small amount at a time, beating only until smooth after each addition. Bake in greased small muffin pans in hot oven (425 degrees F.) 20 minutes. Makes 12.

### Golden Fleece

#### Australia To Erect Bronze Statue To Merino Ram

Australia is to honor the sources of its golden fleece by erecting a bronze statue of a Merino ram on the summit of Mount Panorama, near Bathurst, New South Wales.

The statue will be about 1 1/2 times life size and will be designed by an official of the Sydney Technical College. Cost of the bronze will be shared by the Grazier's Association and the Sheep Breeders' Association.

Wool is Australia's most valuable primary product—exports for the financial year 1936-37 totalling \$62,504,567 (about \$250,000,000).

England has more than 35,000 dramatic societies—one for every thousand persons.

## Discovery Of New Star

### Believed By Scientists To Be Hotter Than The Sun

Discovery of what may prove to be the hottest, densest, and at its maximum the brightest object ever known to mankind was pictured to natural scientists in convention at San Diego.

It is a star weighing about 6,000,000 tons to the cubic inch. Only 60 miles in diameter but 400,000,000 times as bright as the sun at its zenith.

Prof. Fritz Zwicky suggested it may prove to be one of the most far-reaching proofs of Einstein's theory of general relativity. He described it to the annual convention of the Pacific division of the American Association for the Advancement of Science.

This super nova (a "suicide star") was discovered last August at the new Palomar Observatory, which is to house the world's largest telescope in two years.

At its maximum it was the brightest object ever observed, 400,000,000 times as bright as the sun. Now it is a million times as bright as the sun, but has shrunk from the size of the sun to a collapsed neutron star only 60 miles in diameter. Its surface temperature, Professor Zwicky believes, may be at least several hundred thousand degrees.

## A Quaker Wedding

### Quaint Ceremony Took Place In Long Island Meeting House

Down the aisle dividing the men and women in the Matinecock Meeting House in Glen Cove, L. I. marched satin-gowned Florence Elizabeth Willits and Isaac Hicks Cocks. They sat down on a plain wooden bench facing 200 guests. For several minutes there was no sound in the ancient frame building. At length, when the spirit moved them, Florence Willits and Isaac Cocks rose and faced each other. The man took the girl's hand, declared he would take her for his wife. The girl repeated the pledge. Then they sat down. Thereupon everyone present signed a wedding certificate. Thus last week, in traditional Quaker style, Isaac Cocks and Florence Willits became man and wife. Too plain a ritual for modern brides, it was only the second wedding ceremony the little Quaker meeting house, which was founded in 1725 and today counts few youngsters in its congregation, had seen in 102 years.—Time.

### Not Eligible

A league for the protection of hen-pecked husbands was formed in a small northern town, and at the first meeting a man named George was elected president.

George had just taken the chair and banged the table for order when a tall, gaunt, stern-looking woman burst into the hall, rushed at George and seized him by the collar.

"You come home!" she shouted, shaking him. "What business have you in a place like this? You are not henpecked!"

At Bakersfield in California is an oil well 15,004 feet, or nearly three miles deep. Oil is now flowing from the well, which is the deepest in the world, at the rate of 2,800 barrels, 117,600 gallons, a day.

I sweeten my morning cereal with **BEE HIVE Syrup** because it is better for me.

**TRY IT TOMORROW**

## Flies Are A Menace To Every Community

### Take Precautions To Protect Children From Summer Epidemics

Here is something for every mother to ponder over. According to a leading recognized medical authority, diarrhoea and enteritis (which are synonymous with summer diarrhoea) was the first cause of deaths amongst children, from the second to the twelfth month of life, in Canada during the period 1925 to 1929.

It is acknowledged in medical and scientific circles that common house-flies harbor germs in, and on, their bodies and may, therefore, introduce infections into foods on which they crawl.

How important it is, then, to protect milk and other liquids, feeding bottles and other receptacles from these filthy pests that threaten the lives of children with typhoid, diarrhoea and other dangerous diseases.

The dirtier the surroundings, the more flies will swarm and multiply in their thousands. Out-of-doors breeding spots such as uncovered garbage should be tightly covered; all refuse, manure, rotting matter, etc., should be cleaned up; all food and drink should be protected with coverings, and windows and doors carefully screened. If, however, with these precautions taken, flies should find their way into your home, a few Wilson's Fly Pads, placed around the house in convenient places, will soon kill them all. And, if the pads are kept in place during fly-time, they'll go a long way towards protecting your children from summer epidemics and your family and yourself from the dangers and irritation that are caused by flies.

### International Exhibitions

An international agreement controls international exhibitions, and stipulates that they can only occur once every six years. The next international exhibition cannot take place until 1941 under this agreement.

In France all Customs notices appearing normally in other languages than French will in future be also in Esperanto.

## Safety Of Democratic Countries Depends On Strength Of Their Air Fleets

The safety of democratic countries, if not their existence as independent nations, depends so much on the relative strength of air fleets that unusual interest attaches to reliable aircraft data. The Aircraft Year Book for 1938, published by the Aeronautical Chamber of Commerce of America at New York, supplies some important evidence.

The Year Book begins with the statement that the principal powers of the world are striving for supremacy in the air in preparation for a war that seems to become more imminent with each passing month. Germany, Italy and Russia are building up huge air forces which conceivably might force an early decision in any conflict. War might be precipitated if other nations remained unprepared in the air. Britain's policy, as seen by the Year Book, is to postpone hostilities until her air strength surpasses, even doubles, that of Germany. The British program probably is "the most elaborate in Europe," aeroplane factories operating day and night to produce machines of the most modern and effective types.

The editor of the Year Book asserts that the condition of France is pitiful. Political unrest and a wayward program of testing socialistic theories by nationalizing the French aircraft factories have combined to place her air strength in serious jeopardy. The technicians are losing their initiative under the nationalization scheme. Products of the French plants are not as numerous nor as efficient as the machines coming off the assembly lines in neighboring countries. Nor is the training of war pilots and auxiliary personnel so extensive. More than half of the machines in the French force are not fit for active service against a first-class power. These are, of course, only the views of the editor of the Year Book.

Italy, on the other hand, has profited from her experiences in Ethiopia and Spain. Her aviation program has gained headway, based on laboratory investigation at home, practical research in the field and a policy of making Italy the equal of any possible rival.

The book gives little information about the strength of the German air fleet, but observes that "Germany's assertion that the aerial squadrons of the Reich were capable of backing up any demands that Germany might make, struck the world with all the impact of a mailed fist, a mailed fist with wings, wings capable of hurling tons of explosives on the most distant confines of European countries at a speed of not less than three miles a minute."

The Russian air force is rated high. The Year Book states that the planes produced in Russia last year showed great improvement over those previously produced. They were cleaner in design and performed better. Production speeded up in Russia during 1937 and new models are being turned out at a rapid rate. Russian women workers are demonstrating that they are much better than men in nearly every branch of aircraft manufacture. They learn the trade more quickly, are more adept with precision work and more adaptable to the rigorous discipline and care required in aeroplane construction. Russia is bound to be a formidable foe in the air.

Japan has resolved to improve her air fleet regardless of cost, and has a big program underway. The United States has led for years in aerodynamic research and her civil and military planes are unexcelled, in the opinion of the Year Book.

This is the anxious period in aircraft construction. The dictators may have a temporary advantage today and be tempted to strike. Next year the democracies and their allies may have regained a lost superiority. —Toronto Star.

### How To Remember Names

Seven rules for remembering names, as well as faces, are: Pay attention during an introduction; look at the person's face; think of the name; get it right; associate the name with something; and analyze the name so that it has a meaning.

### Crux Of The Problem

#### Man Behind Wheel Still Holds Secret Of Traffic Safety

Almost complete safety at 50 miles and more an hour in city traffic is envisioned by engineers who combine solid knowledge with imagination. At the recent national safety seminar, states the Buffalo Courier-Express, Dr. Miller McClintock, director of the street traffic bureau of Yale University, pictured the magic city of Matronia, 100 thought years in advance of the present. In this almost perfect city there will be express highways on elevated streets over local traffic and ingeniously-constructed walks to remove hazards for pedestrians. The building of Matronia, as described in the illustrated talk, will be 1,500 feet in height and all loading and unloading of goods and the parking of automobiles will be within and under these buildings.

Dr. McClintock's city of Matronia will be an ideal, or a near ideal, so far as the traffic problem is concerned. You may have noticed that our comment on the traffic expert's dream is somewhat restrained. That is because we detect a fly in the ointment. No plan, however cleverly designed, can reckon without the human element. There is the catch. The driver is the actual crux of the traffic problem.

The seminar which ran for five days was highly constructive and practical in the opinion of the sponsors. Experts of national reputation gave concise presentations of major causes of traffic breakdowns and many suggestions for remedial programs of action. The most important of the last are education of automobile drivers, amplification of traffic laws and strict enforcement. However inspired the engineer, or clever the device, the man behind the wheel remains the crux of the problem.

### Early Manitoba History

#### Recalling The Visit Of La Verendrye Two Hundred Years Ago

The discovery a few days ago of an Indian grave near Dauphin attests once again that Manitoba has a history behind her, brief two hundred years that it be. Who was that Red-skinned warrior buried so long ago with all his worldly possessions for use in the Happy Hunting Ground? What brave days had been his? Who were the White men from Montreal that he met, and traded his furs for knife and pot and scissors and trinkets?

That they were from Montreal is clear from the evidence of the bangles stamped "Montreal". And we know from records that La Verendrye was in those parts just 200 years ago. Perhaps that Indian warrior knew the indomitable French-Canadian explorer whose bicentenary we celebrate this September! It is a not-too-far-fetched thought.

There must be many as yet undiscovered traces of the La Verendrye era in Manitoba's story, and as development of this province continues we can expect to stumble upon them from time to time. They will add to the record, and they will help us to realize the great debt the West owes to that intrepid explorer.—Winnipeg Free Press.

### To Photograph Wild Life

#### Lorene Squire Of Kansas Goes North To Take Pictures Of Water Fowl

Lorene Squire, slender photographer of wild life from Kansas, has been inoculated by a doctor-uncle against "all the ill winds that blow, including poison ivy," she said in Winnipeg. She is bound for Fort Chipewyan, Alta., and Aklavik, N.W.T., for more water-fowl pictures.

"Can you imagine poison ivy in northern Canada?" she asked. "It gave me a fine rash. I've nearly died being prepared."

Miss Squire will attempt color photography for the first time this year. "I got as many pictures in Canada last year as I got in 10 years in Kansas and some people think they're better," the young woman said.

### Knew The Grain Trade

#### The Late George J. S. Broomhall Supplied Statistics For 50 Years

Probably no name was as well known in the international grain trade as that of George J. S. Broomhall, who died in Liverpool, England, at the age of 82 years. For fifty years the late Mr. Broomhall has been supplying information and statistics on the grain trade until his name became a household word in the great wheat exporting and importing countries.

The United Kingdom is the centre of the grain trade of the world and the buying and selling of wheat on an international scale has been big business in Britain for generations. Hence, it was natural that an institution for the supplying of accurate news of what is transpiring in grain trade circles should find ready favor in that country. The man was well equipped for the job, having a practical knowledge of grain trading in one of the largest offices in London, eight years experience as a successful broker on the Liverpool Corn Exchange and a penchant for economics.

The late Mr. Broomhall had a broad vision and an understanding of the problems of wheat producers in exporting countries as well as those of wheat consumers in importing countries. Many times during the depression he deplored the disastrously low level of international wheat prices and commented from time to time on the economic folly of producing huge quantities of grain for which there was no available market. While his experience and education naturally led him into that group known as classical economists, Mr. Broomhall was by no means intolerant and his writings would lead to the belief that he understood the new developments in the world which prevented the free exercise of the supply and demand theory, and the changes brought about by narrow nationalism.

There will be general regret throughout the world at the passing of George Broomhall. He lived a long life and a useful one.—Wheat Pool Budget.

### Building Air Raid Shelter

#### Australia House In London Plans Protection For Its Staff

Australia House, situated on the Strand in London, has announced the building of the nation's first major air raid protection shelter in the basement, acting on orders from the commonwealth government.

The shelter, which will accommodate the staff of 100 and 600 others, will cost about £21,000 (\$100,000). The plans provide for strengthening the basement so that even if the whole building were blown up, those below would be safe.

Vincent Massey, Canadian High Commissioner in the United Kingdom, is known to have taken part in air raid protection conferences, but it has not been revealed if Canada House is taking action to protect the staff and visitors against possible air raids.

## Difference Of Opinion On Influence Of Sun Spots On Weather And Crops

### Oldest Commercial Metal

#### Copper Was Found On Island Of Cyprus Centuries Ago

Copper is the oldest of commercial metals. It was first found by a half-savage tribe on the Island of Cyprus, off the Greek coast, centuries ago. It became so cherished as to be called "Cyprish Metal" which name it has kept through the centuries, modern tongues changing it to "copper." The metal is credited with being means of founding modern civilization with all its comforts and utilizations. Perhaps the oldest copper roof in the world is on Hildesheim Cathedral in Germany, many parts of this roof extant since 1320, incidentally some 174 years before America was discovered.

Copper has been used for conveying water for centuries. The Copper and Brass Association has a piece of copper pipe that carried water to the ancient Egyptians some 5,500 years ago, and part of this is on exhibition at the Berlin Museum. The metal is now used in a thousand efforts, commercial, household and industry. The United States government has estimated termites do an annual damage to property of approximately \$50,000,000, and copper has become used against these tropical insects as protection, copper or copper alloy shields being laid between foundation walls and the superimposed woodwork of buildings affected. Perhaps the greatest advance to modernization has been the use accorded copper in electrical and lighting conveniences.

### British Columbia Cedar

#### Valuable Wood That Should Be More Extensively Used

The decision to build 2,500 houses in Scotland, principally of British Columbia cedar, should have the effect of spreading the gospel of British Columbia cedar throughout the United Kingdom, and perhaps round the world. It might even spread it in Canada, where this prime British Columbia wood is not as well known or as extensively used as it should be.

Cedar is commonly used for shingles, and largely used for siding, but outside that, the housebuilder does not do much with it. If he only realized its possibilities, he would use it more. For panelling and ceiling and inside trim, it is an excellent wood.

Indeed, in housebuilding, it could be used for almost every purpose except flooring and where great strength is required.—Vancouver Province.

A bishop noted for his quick wit was asked whether he knew the way to heaven. "Oh, yes," came the prompt reply, "I have known it from a child. Take the first turn to the right, then keep straight on."

### An Exclusive Alice Brooks Panel

#### PATTERN 6160

Every youngster knows this most beloved of children's prayers. The old English letters are in cross stitch, the remainder in gay colors. In other easy stitches. Pattern 6160 contains a transfer pattern of a panel 14 x 18 inches; color chart and key; materials needed; illustrations of stitches.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Household Arts by Alice Brooks

Just the thing for some youngster's room

The theory that sun spots influence the weather of the earth and therefore crops and business prosperity is being generally accepted, but much difference of opinion exists as to the character and degree of the influence. Some specialists insist that the sun spots affect human behavior and cause not only volcanic eruptions, earthquakes, hurricanes and floods, but mass madness and wars.

Sun spots are not dead patches on the sun, but areas in which colossal windstorms of a twisting nature arise to cool off the incredible heat of the solar sphere. Some of the spots are as broad as the earth. They are said to reach their maximum intensity every 11 years, but the records seem to show some maximum years only seven years apart and others thirteen years apart. The sun spots produce ultra violet rays and cause widespread magnetic disturbances over the surface of the earth. Europe and North America were greatly disturbed in this way two months ago.

The last period of maximum sun spots was in 1928, which would seem to indicate 1938 as the next year of maximum activity. Most scientists, however, seem to regard this year as the maximum year. Prof. De Lury, former president of the Royal Astronomical Society of Canada, told the American Association for the Advancement of Science at Ottawa that "We reached the maximum of this cycle last July." He regarded that omen as being favorable for agricultural and commercial interests.

If the experts would only agree ordinary people would know what to believe about these matters. But on one hand experts suggest that maximum sun spots means good crops and prosperity and on the other hand other experts say the reverse is true. Carefully prepared Canadian data by meteorological authorities show that the mean temperature of Calgary during four separate years of sun spots minimum between 1888 and 1933 was 38.8 degrees Fahrenheit and that for three separate years of sun spot maximum it was 38.3 degrees. In other words, sun spots had little influence upon temperatures in that part of Canada. Records for the 45-year period showed that 1893, a maximum sun spot year, had the lowest mean temperature on record, where as in 1928, another maximum year, had within .4 degrees of the highest mean temperature.

Foreign authorities nevertheless say that of the last five maximum years all but one showed temperatures below the average and of the previous six minimum years all had a mean average a little above par. As a general thing rainfall is lower during maximum years and higher during minimum years, but the reaction is not the same everywhere nor always the same. The Johnstown flood came in a minimum year. Many wars and natural disasters have come in maximum years. This year is at or near the period of maximum solar activity and western Canada has had more moisture than usual and is anticipating good crops. The international situation is precarious and if sun spots have the audacity to tamper with the mentality of dictators this may continue to be an anxious year.—Toronto Star.

### Canadian Kennel Club

#### Advocate Taking Of Nose Prints For Identification Purposes

Dog nose prints, comparable to human finger prints, are advocated by the Canadian Kennel Club for identifying registered dogs, in preference to tattooing.

Tattooing is of no lasting value in dog identification, is painful and opens the way to abuses, in the club's view. That is why it decided to take action against a new insistence by the Dominion department of agriculture that members of the club comply with the tattooing regulation before the club's charter is renewed, involving loss of registration.

Four Northumberland, Eng., men have gone to the Farne Islands for four months to guard the rare birds and their eggs.

## The World of Wheat

By H. G. L. STRANGE

Many farmers decided last year to change their wheat variety; in Alberta from Garnet to Red Bobs, and in the rust areas of Saskatchewan and Manitoba from Marquis or Ceres either to Thatcher, Renown or to Apex.

Very special care must be used if during harvesting and threshing the new variety is not to become mixed with the old sort. From experience I have found the following methods will keep grain pure, at least from fields of five acres or more.

1. Stook new variety on its own stubble, leaving a wide space between the stooks of the new and old variety.

2. Clean the racks before hauling the new variety to the threshing machine.

3. Thresh the new wheat variety if possible after oats (Oats can easily be separated from wheat with a seed cleaner.)

4. Run the separator idle for ten minutes. Then clean out the two augers at the bottom of the machine, either by removing the bottom pans, or by passing a doubled-up sack slowly through each auger.

5. With a whisk broom clean the lodged grain from ledges and cracks inside the separator.

6. Run the separator another five minutes and clean the augers again.

7. Discard the first six bushels threshed and sack the remainder or thresh it into a clean bin by itself.

Following factors have tended to raise price: Damage from grasshoppers and rust in Western Canada -- Australian rains insufficient in main sections -- Rust and lodging of wheat in Czechoslovakia -- Tunisian wheat crop smaller than last year -- Italian corn deteriorates from hot dry weather -- Spain buys U.S. wheat cargoes -- Bulgarian corn deterioration -- Germany wheat prospects doubtful.

Following factors have tended to lower price: More peaceful European political situation -- Argentine moisture reserve very satisfactory -- Greece offering to resell Australian wheat cargoes -- Belgium re-imposes wheat import duty -- Rains benefit Roumanian corn -- Expect German rye crop will exceed last year -- Prairie harvesting starts -- Rains improve South African wheat crop.

## Knox United Church Notes.

Rev. J. R. Geeson will resume services on Sunday, August 7th, as follows:

Westerdale at 2:00 p.m.

Westcott at 4:00 p.m.

Didsbury at 7:30 p.m.

A cordial invitation is extended to all.

## Evangelical Church Notes.

Services will be regular next Lord's Day. The pastor will speak from the subject "Seeing the Halo" and from the subject "Profit and Loss" in the evening.

Come early enough for the morning service and stay to the Sabbath School. We are trying for a record attendance in our Sabbath School. It depends on you.

## U.F.A., U.F.W.A. Rally and Convention

When the annual convention of the Didsbury constituency U.F.A. and U.F.W.A. was held on Wednesday, at Lone Pine Hall, the following officers were elected for the coming year: President, Ray Wood; hon. president, Mrs. H. W. Wood; vice-president, Mrs. A. J. Cameron; secretary, Mrs. Cora J. Kearns; directors, P. J. Rock, R. McNaughton, Fred King, Mrs. Ray Bell, Mrs. A. Claypool, Mrs. M. Styles, Mrs. N. Eckel, J. McDougall, and Geo Burns.

Speakers for the day were: E. M. Brown of Acme, reeve of Norquay M.D., and A. B. Claypool of Swallow, ex-M.L.A.

The former dealt with the disadvantages municipal councillors faced in dealing with the present provincial government in contrast with the U.F.A. government. One highlight brought out was, that under the U.F.A. regime some \$17,500 had been received in various grants to help his M.D. finance, while not one cent had been forthcoming under the present government. But taxes were raised, road building had suffered, some being closed, and councillors found it impossible to finance anything outside of direct relief.

## Cut Matured Barley July 30

Mr. Dan Dippel reports that he cut matured barley on July 30th. This is the earliest he has ever cut any ripe grain. It was so heavy that it took three and a half pounds of six hundred ft. twine to the acre.

## Correspondence

[The following letter was received in recent mails and is published for its news value only.—Assistant Editor.]

Editor, Didsbury Pioneer:

A meeting was held in the U.F.A. Hall at Acme on Monday evening, July 25th, with the purpose of forming a Unity Organization in the Acme district. The meeting was well attended by some of the prominent business men and farmers of the near vicinity.

Mr. J. D. Patterson was elected as chairman for the meeting and Mrs. C. Young acted as secretary.

The object of the Unity Movement is to unite all political parties, except Social Credit, into one, and get properly organized ready for the next election.

Mr. A. B. Claypool of Swallow, well known in this constituency, was present and gave a short but helpful address, saying, he was very pleased to see Acme making a move in this way to get this organization started.

Dr. W. G. Fowler, W. L. Tolton, B. O. Brown and L. McCook also spoke briefly on the object of the meeting.

The following motion was made by Harry Bowell, seconded by N. H. Purvis: "That a Unity Organization be formed in the Acme district and a committee of three be appointed to get into contact with outside points, and get them to organize, and for the committee to arrange for a Public Meeting to be held here in the near future, with these points co-operating in getting speakers for the meeting." This was carried unanimously.

The committee appointed were: Dr. W. G. Fowler, chairman, J. D. Patterson and Louie T. Oel. Harry Bowell will act as secretary.

This committee will have full charge of organizing and at the public meeting, when it is hoped delegates will be present from outside points, a full slate of officers will be elected.

HELENA A. YOUNG,  
Sec pro tem.

## Junior Board of Trade Notes

Everyone is reminded of the smoker and "get-together" in the Legion Hall Thursday, August 4th, at 8:30 sharp. The Junior Board of Trade will be host to the Senior Board of Trade and senior business men of the town and district.

There will be short talks by both senior and junior men on topics of common interest. Let's make this occasion a success. There will be plenty of lunch.

The Public Speakers Committee meets again Thursday evening, August 11th, in the public school. Its a good time to get into the swim, you fellows, so let's turn out in full force.

## Local W.I'S Well Represented At Farm Women's Week

The district is well represented at the Farm Women's Week, being held at the Olds School of Agriculture this week.

Among those enjoying this four days' rest and recreation period are Mrs. H. Richardson and Mrs. N. Eckel from Lone Pine W.I.; Mrs. M. Campbell, Mrs. Jas. Hoesgood, Mrs. A. F. Cowitz and Mrs. Walter Herbert from Rugby; Mrs. E. Klinck, Mrs. R. Webster, Mrs. J. Hughes and Mrs. E. Tuggle from Westcott; Mrs. Fletcher, Mrs. Perrin and Mrs. Cliff Gibbs from Westward Ho; Mrs. A. Stewart from Siebertville, Mrs. Jas. Dundas, Mrs. Alex. Dundas and a great many more ladies from north, south, east and west.

Don't worry about your binder canvas. Take it to Scott's and have it properly repaired.

## Melvin Notes.

The Sports at Melvin Wednesday last seemed very interesting to all present. Three games of baseball, three of girls' softball and one game junior boys' softball complemented the excellent program of horseracing and athletic events. In baseball, Melvin beat Westerdale 11-4 and Harmattan beat Didsbury 7-2, while in the finals between Harmattan and Melvin, Harmattan gained a 15 to 9 victory. In boys' softball, 8-6 was the score to which Melvin won a game with Didsbury. Girls' softball results were as follows: Garfield and Melvin, 16-9 for Melvin; Glovermount vs. Harmattan 5-4 for Harmattan and in the final between Harmattan and Garfield, 16-5 for Garfield. Day closed with a big dance at night.

The first playoff game of the season of the Bush Baseball League was played on Sunday with Melvin visiting at Dogpound. Melvin defeated Dogpound by 14-11. Second game will be played at Melvin next Sunday.

Mrs. J. McDougall is visiting with friends in Banff.

Mr. and Mrs. A. Essler and Kenneth of Brent spent the weekend visiting relatives in the district.

Mrs. Geddes, and children of Calgary spent the week at the home of her brother, Mr. Emil Dupont.

Frost and Wood binders, see the latest in horse and tractor types—Mac & Boettger

## Burnside Notes

Mr. Adam Schumaker was a Sunday visitor with Robert Eckel.

Mrs. C. L. Cipperley and daughter Leita spent the weekend with relatives in Calgary.

Mrs. Joe Davidson and family left last week to join Mr. Davidson in Kamloops, B.C.

Melvin Gill, eldest son of Mr. and Mrs. Neil Gill, had his tonsils removed Saturday at the Didsbury Hospital.

Mr. and Mrs. George Burns and family were Sunday visitors at Sylvan Lake.

**At The Movies**

Crawford, Gable at their gayest in "Love On The Run"

Joan Crawford and Clark Gable have the time of their lives in their new co-starring picture, "Love On The Run," which comes to the Opera House on Friday and Saturday. It is safe to say that the film public viewing this picture will have the time of its life as well. Not in a long time has there been a picture which has the freshness, gaiety and spontaneity of "Love On The Run."

Acted to perfection by its ace team of stars with the support of Franchot Tone, Reginald Owen, Mona Barrie and others, the new offering has wit, charm and pulsating action.

## WORLD HAPPENINGS BRIEFLY TOLD

Mrs. E. Vermilyea, Campbellford, Ont., claims a world record as a teacher. She has taught since she was 16 years old, a total of 66 years.

A 12-foot Indian python reported missing from a London house and for which police searched was found asleep behind a wardrobe in the house all the time.

One hundred and thirty convicts from the Kingston penitentiary have been distributed among western Canadian penitentiaries. The Kingston penitentiary was overcrowded.

Miss Ada Lent of Edmonton, Alta., was named president of the British Empire Club at the annual meeting held in International House, New York. Miss Jessie Casselman, Vancouver, was elected secretary.

Dr. Charles R. Dickson, 79, one of the earliest experts of X-ray, who was blinded by exposure to its ultra violet rays and in 1914 founded the Canadian Institute for the Blind, died recently in Toronto.

There were 40,800,000 pounds of creamery butter produced in Canada in June, an increase of seven per cent. over June, 1937; 41 per cent. May, 1938, a Dominion bureau of statistics report said.

Venezuela, member of the League of Nations since 1920, has resigned, giving no explanation of her action. Resignation from the League of Nations becomes effective two years after formal notification is given.

Prospects at present were for a good year in the packing industry. President J. S. McLean told shareholders at the annual meeting of Canada Packers, Limited. Directors were re-elected and reports adopted.

### Check On Firearms

#### Registration Of Revolvers And Pistols Is Made Necessary

Royal Canadian Mounted Police headquarters issued a statement urging the public to co-operate in enforcing the new amendment to the criminal code with registration of revolvers and pistols which was passed at the recent session of parliament.

The amendment requires persons possessing revolvers or pistols to register them between March 1 and July 1, 1939, and periodically every five years thereafter. In 1934, when registration of weapons was first made compulsory by parliament, no provision was made for a periodical re-registration.

The amendment, the statement said, will have "the effect of helping the public to decide whether they really desire to retain as souvenirs or for the sake of protection, pistols and revolvers which may be stolen, and therefore may be a source of danger rather than protection. The law compels the registration of all pistols and revolvers, whether held as souvenirs or for any other purpose. In Great Britain, all dangerous weapons of this kind must be re-registered every three years."

The firearms registration section has proven helpful to various police forces throughout the Dominion in identifying firearms found at scenes of crimes or on persons arrested, the statement said.

### Voluntary Militia

#### Empire's Second Line Responsible For Home Defence

In Britain a voluntary militia chosen from men who, between the ages of 18 and 21, had served periods of compulsory citizen service in spheres other than military is strongly advocated by Sir Edward Grigg, parliamentarian and writer, in his book, "Britain Looks At Germany."

This would be the empire's second line—responsible for home defence. Every young man, would perform citizen services of some kind for three months but for the majority it would be physical training and public works on lines of civilian conservation corps of the United States.

### More Spots On Sun

The sun, says Astronomer I. M. Levitt, of the Franklin Institute, is breaking out in a rash again. Levitt said he counted 200 spots on old sol's face and predicted the number for the year might surpass the number visible during 1937, when a 67-year record was broken.

### Queerest Horse Races

#### Have Been Run Half Yearly In Italy Since 1721

One of the world's oldest and queerest horse races, the Palio, was performed in a recent week in the municipal square at Siena, Italy.

Mediaeval pageantry dominated the scene as banners and costumes of 600 years ago were mingled in the crowds of townsfolk.

Ten horses were chosen by lot to run for the honor of 10 of the town's 17 contradas, or wards. The palio, or prize, is a huge silk banner.

Rules did not prevent the riders from beating one another's horses.

The jockeys rode three times around a brick-paved tilted piazza. Mattresses padded some of the dangerous corners.

Police waited at the finish line—to protect the winner from friends and rivals alike. So fierce was rivalry once that inter-contrada marriages were difficult. Such hysteria has passed but families still separate on Palio Day, each member joining the contrada where he was born.

The course has been run uninterruptedly twice a year since 1721. It dates back to the 14th century, however, and grew out of other games traceable to the 13th century.

### For Firm Action

#### Anthony Eden Thinks Britain Should Take A More Positive Stand

"It is certainly not true to pretend that for this country to take firm action in defence of its own legitimate interests or of the standards of international decency is to endanger peace," Anthony Eden, former secretary, said in a speech at Stratford-On-Avon.

"There must everywhere be still a reluctance to unleash the dogs of war," he said, "but we hear them bark again. The bark has even become an accepted accompaniment of certain forms of diplomacy. In these conditions it is inevitable that there should be a difference of opinion in this country as to the methods which should be pursued. . . ."

"Some of us would have preferred that this country should have taken a more positive line in respect to events in the Mediterranean in the last six months. Whether we were right or wrong is a matter of opinion. . . ."

"There is to my mind a preferable course—to make it clear that our policy must be conditioned by certain principles of international conduct which we have always upheld and from which we cannot depart."

### Study The Planet Venus

#### Scientists Seek Information About This Unknown World

Astronomers of Lowell Observatory at Flagstaff, Ariz., are observing large white clouds on the planet Venus for clues to what is happening on this unknown world which is the earth's twin in size.

The clouds completely cover Venus. But they change their shapes and shadows from hour to hour, driven by furiously fast winds. With aid of a new method of analyzing their reflected light, they have become celestial signals that may reveal the mysterious forces beneath them.

Venus is the next planet inward toward the sun. At times she comes within 27,000,000 miles of the earth. Her diameter is about 7,700 miles. She has sufficient heat to maintain varied forms of life. Although whatever happens on her surface is veiled from telescopes, the clouds hold the key to much fascinating information. It is apparent already from studies of these clouds with the spectroscope that a day on Venus is probably more than two weeks long.

Dr. V. M. Slipher, director of the observatory, says the quality of light reflected from Venus' clouds suggests they are made of dust.

### Proved A Boomerang

W. C. Taylor bought a firecracker to frighten friends at his boarding house, Kansas City. In a dark hallway he reached into his pocket for a cigarette. His fingers clutched the "cracker," placed it in his mouth, lighted it. "I just forgot the darned thing," Taylor told the doctor who repaired his mouth. He lost several teeth.

The farm without weeds is either owned and operated by a master farmer, or the soil is so poor that nothing will grow. 2264

### SEW A COOL SLENDERIZER

By Anne Adams

Here's a heat-defying afternoon frock to invite superlatives—and plenty of them! You who have "weighty" problems to solve, will feel a glow of satisfaction from the first moment of wearing this new Anne Adams style. For Pattern 4725 is not only simple-as-can-be to make; it is a miracle of slenderizing, flattering fit. And it's decidedly youthful—just to put it on is to lose several years of one's age! Let a cool print—preferably a monotone and an indistinct design—enhance the fascination of the flared or puff sleeves, the clever pointed yoke that may subtend a fluffy jabot or bow, the neat panelled skirt. Why not use a silk crepe, a chiffon or voile?

Pattern 4725 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Sizes 36 takes 3½ yards 39 inch fabric. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

### Prehistoric Man

#### Discover Oldest Records Of Human Life On This Continent

A wily, acorn-eating fellow who roamed the glacial and volcanic wastes of northern California at least 13,000 years ago apparently was the "dawn man" of North America.

He made only the crudest of tools. None had handles. And if he hunted in the conventional prehistoric manner he left no record of his prowess within reach of the scientific expedition which unearthed his trail. It found no "dawn man" spear heads.

The findings were disclosed by Mark Harrington, head of the joint expedition of the Southwest museum and the Carnegie Institution of Washington, upon completing several weeks of excavating on shores of salty Borax lake, 60 miles north of San Francisco bay.

Relics of four prehistoric cultures were unearthed on the lake shore, but as in other such discoveries there were no remains of the ancient men themselves. Only crude tools and weapons chipped out of glass-like volcanic rock, called obsidian, and the remains of a bonfire. The "dawn man" knew how to keep warm in that age of glaciers, and perhaps how to cook a little.

The first culture found was that of the Folsom man, hitherto regarded as one of the oldest records of human life on the continent—10,000 to 15,000 years.

### Shows Figure Of Late King

One of the lights of a stained glass window that has been given to Winchester Cathedral by Americans, as a tribute to the life and character of King George V., contains a representation of the kneeling figure of the King, wearing the robe of the Order of the Garter.

In nine months Japan has inflicted proportionately as much damage on itself as on China.

### Funeral Causeway

#### A City Of 20,000 Dead Is Unearthed From The Dust Of Fifty Centuries In Egypt

A city of 20,000 dead and a richly ornamented funeral causeway have been unearthed from the dust of 50 centuries at Sakkara, Egypt.

The discoverer, Selim Bey Hassan, said at least 20,000 mummies lie in the necropolis beneath the causeway which connected a valley temple with the funeral chapel of Unas, last king of the fifth dynasty.

Discovery of the causeway was termed a find of highest importance because inscriptions on the walls answered the question if ancient Egyptians cut and dressed granite for statues and temples.

The causeway is a passage 700 yards long and seven feet wide. The side walls, nine feet high, were covered with the largest known collection of old kingdom inscriptions and scenes.

Scenes depicted included the transport by boat of red granite columns and capitals from Assuan to the pyramid of Unas, wrestling between Egyptians and Bedouins, and transport by boat of Asiatic prisoners.

The cemetery was cut from solid rock and covered several acres. It was traversed by long galleries from which passages led to funeral chambers and storerooms. Along with the thousands of mummies were found pottery vases and fragments of alabaster vases.

### More Neighborliness

#### Privilege For Motorists Who May Remain South Of The Line For Six Months

Canadian motorists will welcome the privilege of remaining south of the line for six months without having to put up a bond. This extension, which has just gone into effect, from the previous time limit of 90 days, is due in no small part to the efforts of the American Automobile Association.

Canada, about a year ago, made a similar extension of the stay privilege in favor of American motorists. The change marks an important concession to the convenience of touring motorists who cross and recross the border.

Hitherto Canadians, arranging to stay in the south for the full period allowed have occasionally been held up by blizzards or other uncontrollable causes. Delay, inconvenience and red tape are now less likely to be encountered, and President Roosevelt's principle of neighborliness scores another point.—Winnipeg Tribune.

### Unseaworthy Cruisers

#### Report Says Japanese Are Having Trouble With New Vessels

Six 8,500-ton Japanese cruisers of the Mogami type, construction of which forced a change in the British naval program of 1934, have proved unseaworthy and are not yet in active service, the naval expert of the London Sunday Times says.

Several new aircraft carriers also proved unsatisfactory for service, the writer said, and the Japanese navy has been forced to experiment with gyroscopes which present new and complicated difficulties.

"All six of these ships," he said, referring to the Mogami cruisers, "have failed to join the fleet at the time originally intended. Some of them have been delayed in the dockyards for more than a year while modifications have been carried out. "These modifications have been concerned with the stability of the ships and I understand that the Japanese have been forced to remove one of the main armament gun turrets to give the ships sufficient stability."

### Singing Mouse Is Dead

Mickey, the singing mouse, is dead. Mickey's songs were stilled in a cage at the home of Mr. and Mrs. Frank Weaver, Olitic, Indiana, where he was "discovered" as he warbled in a closet. Subsequently the mouse appeared on a national radio network.

London has an all-black building. The facade is made entirely of polished black granite, which reflects color from the sky and glitters in the sunshine.

Middle age is that period in a man's life when he would rather not have a good time than have to get over it.

### The Queen's Mother

#### Countess Of Strathmore Preserved Simplicity In Her Home

The Countess of Strathmore in all she did preserved the simplicity and dignity of a great lady whose life was centred in her faith and in her home.

Her tastes were simple; she took a keen interest in gardening and needlework, and round the border of the canopy of one of the great four-poster beds at Glamis Castle she worked with her own hand the names of her nine children, with the dates of their births. She embroidered many exquisite tapestries. One of the most cherished heirlooms at Glamis is the great bed in which "Bonnie Prince Charlie" slept. When its rose satin canopy fell to pieces with age the Countess made an exact replica.

She brought up her family without "frills", and there was always a homely atmosphere in the feudal castle at Glamis, set amid a background of hills, lochs, heath and moorland, where our Queen spent her childhood. The Countess taught the little girl to sew and cook like any good Scots maid, and when war turned Glamis into the pleasantest of hospitals for wounded soldiers the young Lady Elizabeth Boves-Lyon knitted socks with the village girls.

### Lookout Towers

#### Change In Method Of Detecting Forest Fires In National Parks

A radical change in the method of detecting forest fires in the Riding Mountain and Prince Albert National parks has been instituted in both reserves, according to P. A. McDonald, assistant Dominion forester, in the west to inspect the new equipment. The system includes a number of lookout towers, strategically placed, to give complete coverage of the parks, which, he declared, is more efficient and cheaper than any method previously used.

Mr. McDonald has just completed a tour of all western national parks and was in conference with G. Tunstall of Winnipeg, who is in charge of Dominion forestry work in Manitoba and Saskatchewan. The towers in Riding Mountain park are being located by J. D. B. MacFarlane of Ottawa, with A. L. Best, forestry ranger, in charge of construction.

### Always Something To Learn

#### Worth-While Persons Never Satisfied With What They Know

S. S. Schmetzler, author and educator, writing in the Rotarian Magazine, says little homes, little bank accounts, little educations, are all very well in themselves provided they don't drug us with a false sense of having reached the end of the road of achievement instead of merely being at the beginning of it, and provided we don't allow those who have ceased trying, to rob us of the "divine unrest" of which the poet speaks. . . . Let us enjoy the things which we have, but let us not be content with them. Let us love every inch of the tiny mental homes which we now inhabit, but, at the same time, let us dream of intellectual dwelling places bounded only by infinity and roofed over by the limitless sky. Not contentment but aspiration is the food of the giants of our coming generations.

In Germany there are bee farms where the insects are raised for their poison. It is extracted and sold as a cure for rheumatism.

Wrigley's Gum helps you keep fit! Relieves that stuffy feeling after eating. Cleanses crevices between teeth, too... assures sweet breath. A simple aid to health! Buy some now! Small in cost but big in benefits! Enjoy it after every meal—millions do! CS-3

## WHAT HO!

—By—  
RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

### CHAPTER XVI.

Fog, like a gray blanket, pressed down on the sprawling city. It was a "London particular," damp as a Mermaid's kiss, and so thick and palpable it could almost have been molded into fog-balls. Veteran policemen lost their way and taxi-cabs crept along on hands and knees.

Lady Rosa Bingley groped her way to that strip of pavement along London River where the roofless and hungry rest awhile before they are moved on by the police or some higher force.

To find any man in that fog was a feat comparable to finding a midget in the steam-room of a Turkish bath. Lady Rosa collided with a mound of muscle, which growled in a gin-roughened voice,

"Cant' see where yer goin'?"

"No," said Lady Rosa.

"There's more light in Leicester Square," said the man.

"Thanks," said Rosa, and pushed on.

The benches along the Embankment did not hold their usual complement of unfortunates that night.

Before one bench Rosa stopped. It was occupied by an old man, who looked like a bleary, sodden Santa Claus.

"I'm looking for a young man—" "Won't an old one do?" he asked and showed snaggled-teeth in a hideous grin.

"I'm afraid not," she said. "The young man has a dark blue overcoat and an old gray hat—"

"I did see a chap dressed like that an hour ago," the old man said.

"Where did he go?"

"Into the fog."

"Which way?"

"I forget."

She dropped a shilling in his horny palm. He clutched it, and with a "Thankee, lady," got up and melted into the fog.

She moved along the line of benches. When she saw the dim outline of a figure on one of them in the muffled lamplight, she would draw closer and call "Ernest! Ernest!"

A Reginald responded, and an Alf and a Kenneth, but not Ernest.

It was slow going, slow, and chilly, and discouraging but she kept on.

After a fruitless half-mile, worn out, she sat down on a bench. Peering about her she saw that on the next bench somebody had left a package, a very large package, large enough to be the laundry of Gog and Magog. It was shapeless, and wrapped with soggy newspapers. Lady Rosa reached out an exploratory finger and touched it.

From inside the package a tired voice came.

"All right, officer. I'll move on."

"Ernest!" cried Rosa. "Ernest!"

"Who knows me around here?" asked the half-awake voice of Ernest Bingley.

"Ernest. Its Rosa."

He broke out of his cocoon, and saw her face, close to his.

"Go away! Scat!" he said.

"Oh, Ernest, what have I done?"

"Are you really real?" he faltered.

"Pinch me."

She held out her arm. He pinched it. She yelped.

"It is you," he said. "It is really you."

"Pinch me again if you doubt it."

"Oh, Rosa, what are you doing here?"

"Looking for you."

"Well," he said, "you've found me."

"Yes, Ernest, I've found you."

She sat beside him on the bench.

"Your teeth are chattering," she said.

"So are yours."

"Let 'em chatter."

"You'd better go some place where it's warm," he said.

"That's an idea. Let's go."

"Not me, Rosa."

"Why not?"

"We said good-bye once," Ernest said. "Let's not go through it again."

"You can't stay here. You'll catch cold."

"I've already caught one," said Ernest, and sneezed. "Please go, Rosa."

"I will not," she said, firmly.

"Well, a cop will move you along shortly," said Ernest. "He's about due. He's moved me twice already."

"Ernest Bingley, what are you doing here?"

"Waiting for a boat."

"Be serious. I am."

"So am I," said Ernest. "My boat does not sail till day after tomorrow."

"You might have chosen a more comfortable spot to wait," Rosa said.

"I repeat my question—why are you here?"

"Just an adventure," said Ernest.

"I'm seeing London night-life. I've read about this place, and I've always wanted to spend a night here to see what it would be like to be down and out. It's good for a fellow in my position to see how the other half lives now and then."

"What would Miss Rowena Castle think of such behavior?"

"Miss who?"

"That's your fiancée," Rosa reminded him.

"Oh, you mean Rowena," said Ernest. "Why she'd approve of it. She's a student of sociology. We often sit in Battery Park or Bryant Park in New York and study life."

"I thought she lives in Chicago."

"She does. But she often flies her plane to New York."

"Does her father own all the hotels in New York, too?"

"No. Only four. Two little ones and two big ones."

"Do you believe it is wicked to tell lies, Ernest?"

"Of course I do."

"Then why tell 'em?"

"Don't you believe her father owns all those hotels?" said Ernest.

"I don't even believe that there is such a person as Rowena Castle."

"But you saw her picture," said Ernest, and sneezed.

"I saw a picture of Lucy Bingley," said Rosa.

Ernest began to tear up his paper swaddling-clothes with agitated fingers.

"I had to do it, Rosa," he said.

"Why?"

"It's a long story—" he began.

"We have all night."

"You'll catch cold."

"I've caught one. Yours. Go on."

"You see, it's like this—" Ernest began again.

"The perfect prelude to a whopper," said Rosa. "But do carry on, Ernest."

"I'm a busy man," said Ernest. "Many interests. Mergers and amalgamations and reorganizations and—well, lots of things that take up my time and attention. Being a bachelor, I can devote all my time to my affairs. If I were married, well, it would take up too much of my time—"

"It might. Carry on."

"So," said Ernest, continuing to reduce the newspaper to scraps, "I invented Rowena Castle. You see mothers of debutantes were always angling to make a match between me and their daughters—"

"Quite the catch, aren't you?"

"Oh, it's not me," said Ernest. "It's my fortune."

"I take it that you do not believe that in these hard days there's any such thing as a pure, unselfish love," Rosa said.

"Oh, but I do," cried Ernest. "I'm sure there is."

"Suppose you were to find a girl who loved you and was willing to

## WILSON'S FLY PADS REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocery or General Store.

10 CENTS PER PACKET  
WHY PAY MORE?  
THE WILSON FLY PAD CO., Hamilton, Ont.

marry you if you didn't have a penny to your name, what would you do, Ernest?"

"I'd grab her," said Ernest. "But where am I apt to find such a girl?"

"On a bench in the fog."

"You don't mean you!" exclaimed Ernest.

"I mean me."

"Oh, Rosa."

He sneezed; and kept his hands in his pocket.

"Come on," she said. "Grab!"

"No," said Ernest.

"Of course, if you don't love me—"

"Rosa, I love you so much I could die. If you asked me to I'd tear my heart right out and throw it into the river there."

"Don't do that, Ernest," she said, softly. "Give it to me."

"Stop. Please. Go away. Let me alone," cried Ernest, wretchedly. "I've deceived you."

"That's what you think."

"Listen to me, Rosa. I'm not rich. I'm not anybody. I'm nothing but a nothing. I'm only—"

"The village canary stuffer without a shop to stuff in," she finished.

"Who told you?" gasped Ernest.

"Does it matter? Do you think I care how poor you are in money when you're so rich in kindness and courage? Besides, you're not poor."

"Oh, yes I am," said Ernest. "I haven't enough for a bed. Just some coppers for food till my boat sails."

"And a twenty thousand pound interest in a castle."

"That was a gift."

"As if Father would take it as a gift. He's a Bingley, too, you know. Let me see now—the interest on twenty thousand at four per cent. is—"

"Rosa!"

"Yes, Ernest?"

"Do you like dogs?"

"Love 'em."

"Cats?"

"Adore 'em."

"Gold fish?"

"My favorite fish."

"Guinea pigs?"

"Mad about the little darlings."

"Is there a pet shop in Bristol?"

"Not a good one."

"There's going to be."

"Yours?"

"Ours."

A hulk of a constable loomed in the fog and advanced slowly toward them.

"Rosa, darling?"

"What, dearest?"

"I love you," said Ernest. "Get ready?"

"What for?"

"I'm going to grab."

He grabbed.

"Ere, 'ere now, you two, none of that now," said Police Constable X0757, playing his flashlight on the bench. "This 'ere ain't no blinkin' Garden of Eden, you know."

"That's what you think," said two voices as one.

The End

### Wedding Of Midgets

Thousand's Blocked Streets During Ceremony In Tiny Town Colony

Several women were trampled on and several others fainted when 10,000 people blocked the street around Sacred Heart church in Blackpool, England, where two members of the midget colony known as "Tiny Town" were married.

Anne Kneps, the 42-inch bride, is the principal dancer of the midget troupe. The groom, Herman Better, is two inches taller. Henry Glower, mayor of Tiny Town, gave the bride in marriage.

Carrots have been under domestic cultivation since the dawn of history. It once was the fashion for ladies to wear carrot leaves in their hats at balls and banquets.

### Heat Exhaustion

Use Of Common Salt Of Benefit To Those Who Work In High Temperatures

The severe muscle cramps occurring among workers exposed to unusually high temperatures, are common among steel workers, miners, foundry men and ship stokers. They are sometimes called "heat cramps", or "miner's cramps". While the existence of these muscular pains had long been known to occur it was left for J. S. Haldane, the eminent English physiologist, to suggest that this condition was caused by the loss of salt in the process of sweating. Another Englishman, K. N. Moss, had previously pointed out that sailors voluntarily ate more salty food during extreme hot weather.

Most people are aware of the symptoms of heat exhaustion. These are general depression, headache, dizziness, nausea, diarrhoea and stomach distress. In the severer forms muscle cramps occur as well. As a result of Haldane's suggestion, a group of mine workers was induced to try the salty water. The results were magical. There were no further attacks of cramps and much less complaint of fatigue than formerly. A similar experiment made in Russia showed that when salt was administered to persons working in high temperature they were less subject to fatigue and heat exhaustion.

The objection to this form of treatment is the salty taste. This has been overcome by the use of five-grain salt tablets to which, as a further improvement, five-grains of dextrose are added.

In the Journal of Industrial Hygiene for December 1931, are given some interesting data on the benefits of salt taken in tablet form by workers in a large steel plant. There were some 3,500 men at work in the plant. In the summer of 1927, heat cramps were responsible for the loss of 48 working days among this group. The use of salt was begun in the following year with the result that only nine days were lost. In 1929, the loss was but four days and in 1930 none.

The means of prevention of the ill effects of heat exhaustion are simple. Ordinarily the use of five grains of salt with each drink of water is ample. Try it!

### Strawberry Not Correct

Popular Fruit Was Called Strae-berry By Anglo-Saxons

Strictly "strawberry" is a misnomer, says the Calgary Herald. It is neither a berry from the botanist's angle, nor does it gain its name from the old custom of mulching between the rows with straw, ostensibly to keep the ripe berries out of contaminating dust.

For the strawberry was esteemed long before the wild berries of meadow-lands and sunny hillsides were cultivated as a garden crop with straw strewn between the rows. To the Anglo-Saxons they were the "strae-berries", from their habit of propagation by runners straying from the parent plant. Correctly, the ancient name of the fruit which conquering Roman legions and Norman knights found ripe and luscious in England glades, persisted among the Cockney fruit-peddlers of London calling "Stray-berry ripe; who'll buy ripe stray-berries?"

### Deep Oil Well

Turner Valley Well Is The Deepest In The British Empire

Drilling at a depth of 9,030 feet, Okalta No. 6 in the western flank of Turner Valley now is the deepest well ever to be drilled in the British Empire in search of oil. W. S. Herron, president of Okalta Oils Limited stated at Calgary. Area well on the High River structure a year ago reached a depth of 8,998 feet when it was abandoned after encountering a heavy flow of water. Okalta No. 6 is expected to reach limestone between 9,400 and 9,500 feet.

Statistics of the book-selling trade in Germany reveal the remarkable fact that the book with the biggest sale in Germany last year was the Bible. The three big concerns distributing Bibles sold over a million copies, 165,000 more than in 1936.

The aircraft of the Imperial Airways and its associated companies cover nearly 28,000 miles a day.

### Poison Venoms

Declared To Offer New Hope For Sufferers From Certain Ailments

The poisonous venoms of bees, lizards, salamanders, and the deadly rattlesnake and cobra were declared to offer new hope to sufferers from palsy, paralysis, spinal cord injury, paralysis, spinal cord injuries.

Use of insect and reptile poison to treat pain from cancer and other malignant diseases is not new. Dr. M. B. Greene, of New York, declared in a report to the American Association for the Advancement of Science, but method of using them to "block off" individual nerves or sets of nerves is now being successfully applied for the first time on a large scale.

The poisons are much more effective in relieving pain than opium or morphine, but heretofore they have been used primarily in making easier the last days of persons suffering from incurable diseases.

A musician in a London restaurant plays what is thought to be the only brass violin in the world. The instrument was made from empty French shell-cases.

### Tenders Wanted.

Tenders are called for a new chimney on the Elkton School, 8 inch flue, approximately 27 ft. Also for the kalsomining of the walls and oiling of the floor. Work to be finished before the end of August.

Tenders must be in the hands of the undersigned by August 11th, 1938. Separate tenders will be accepted.

The School Board reserves the right to reject any or all tenders.

Mrs. D. Evans, Sec.-Treas.,  
Elkton S.D. No. 1935

Harry Reynolds outstanding Canadian lacrosse player, was in town on Tuesday on his way to Olds. On his return, Friday, he and three of his old friends, Eric Moffatt, Al McInnis and "Mac" McNeil, will take the sticks out on the C.P.R. lot. Any old lacrosse players, who would like to get the feel of a stick in their hands again, are asked to be on hand.

A movement is on foot to organize a branch of the Lions' Club in town. J. M. Irving, Dominion organizer, is meeting with very favorable response and expects to complete the organization next week. The Lions' Club is not a fraternal organization, but strictly a service club, which exists for the benefit of the town. It is strictly undenominational and non-political. Its object is service first, last, and all the time. There are over 3,000 Lions' Clubs on the continent.

Clovermount girls softball team and Melvin girls clashed in a softball encounter at Ira Levagood's ball diamond Tuesday night. Some snappy ball was witnessed, the Clovermount aggregation leading 5-3 at the end of the first canto and holding the lead pretty well all through, though Melvin made one splendid rally to tie the game at 5-5. The game was finally called on account of darkness, with Clovermount leading 9-5.

### LOCAL & GENERAL

E. G. Ranton made a business trip to Calgary on Tuesday.

Miss Grace Topley returned home Sunday from her vacation at Sylvan Lake.

Mr. Cyril White has been appointed as the new principal of the Sunny-slope high school.

For Holland Twine see George Parsons at B-A. service station, or A. H. Foote. (31c)
